

**WINIX**

# PlasmaWave™ Air Cleaner

99.99%  
TRUE HEPA

Pure Air. Pure Comfort.

Silently Removes Dust • Smoke • Pollen • Pet Dander • Allergens  
Neutralizes Odors • Bacteria • Viruses • Chemical Vapors

# PlasmaWave™ Air Cleaner

Model: WAC – 9000 & 9000S

Winix **5-stage** air cleaning system includes a washable and anti-bacterial pre-filter, True HEPA filter with 99.99% efficiency, Nano-silver mesh, washable carbon filter and PlasmaWave Technology.

Winix **PlasmaWave** creates Hydroxyls which attack dangerous airborne pollutants such as viruses, bacteria and chemical vapors (VOCs), as well as common household odors caused by pets, tobacco smoke, and cooking.

**WAC - 9000 & 9000S**

## Features & Benefits

### Five-Stage Cleaning

#### Step 1: Washable Anti-Bacterial Pre-Filter

This reusable filter collects large airborne particles such as pollen, dust, pet hair and lint, etc.

#### Step 2: True HEPA Filter

Captures 99.99% of particles and impurities as small as .3 microns including smoke, dust, pollen, mold spores, and pet dander.

#### Step 3: Nano-Silver Mesh

A shield of silver particles one billionth of a meter in size neutralizes bacteria on contact.

#### Step 4: Washable Carbon Filter

Activated granular carbon effectively collects chemical vapors and odors caused by cigarette smoke, organic decay and cooking.

#### Step 5: PlasmaWave Technology

In the final stage of cleaning, PlasmaWave generates negatively and positively charged ions that combine with airborne water vapor to form Hydroxyls. Hydroxyls instantly neutralize viruses and bacteria, chemical vapors, odors, and gases in the air.

### Digital Controls

- Smart Dust and Odor Sensors
- Auto Mode
- Timer Setting
- Light Sensor
- Programmable Remote Control
- 4-Speed Setting
- Sleep Mode
- Change Filter Alert
